

MANYAM JAGADEESWAR REDDY

Location: Kadapa, Andhra Pradesh | Phone: 9110385587 | Email: manyamjagadeeswar7989@gmail.com
LinkedIn | GitHub | LeetCode

Summary

Full-stack developer experienced in designing and deploying scalable web applications using React.js, Next.js, TypeScript, Node.js, and Java. Hands-on experience building secure authentication systems with JWT and OAuth 2.0, implementing role-based access control and real-time communication using WebSockets. Solved 450+ LeetCode problems with a peak contest rating of 1519, demonstrating strong data structures and algorithms proficiency. Seeking a software development internship to contribute to and ship production-grade systems.

Education

Indian Institute of Information Technology Dharwad
B.Tech - Data Science and Artificial Intelligence

Expected Graduation: 2027
GPA: 8.21

Projects

NetViz Pro - Reliable Transport Simulator - GitHub Link

Dec 2025

Tech Stack: Java, Node.js, React.js, UDP, WebSockets

- Developed a custom **Reliable UDP protocol** implementing Hybrid Sliding Window ARQ, ensuring 100% data integrity for binary file transfers (images, PDFs) using checksum validation and packet sequencing.
- Architected a distributed system integrating a Java-based ARQ engine with a React dashboard via a Node.js UDP-to-WebSocket bridge, enabling real-time visualization of packet transmission, ACK handling, and dynamic window resizing.
- Implemented fault-tolerant mechanisms including retransmission timers, cumulative ACKs, and configurable packet loss simulation (0–100%), maintaining reliable delivery with live throughput monitoring.

devOrbit - AI Bug Intelligence Platform - Live Link

Apr 2025 - Oct 2025

Tech Stack: Next.js, TypeScript, MongoDB, TailwindCSS, OAuth 2.0, JWT

- Designed, built, and deployed a **production-ready full-stack bug tracking platform** using Next.js, TypeScript, and MongoDB, supporting multi-user collaboration with **role-based access control**.
- Implemented stateless authentication using **JWT access and refresh tokens** with secure HTTP-only cookies and integrated **OAuth 2.0** (Google, GitHub) for social login.
- Developed modular **REST APIs** and integrated AI-powered bug severity classification using the Xenova/Transformers library for intelligent categorization.

AI-Powered Medical Chatbot - GitHub Link

Mar 2025 - Apr 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets, Google Gemini API, JWT

- Developed a full-stack real-time chat application using React.js, Node.js, Express.js, and MongoDB, enabling instant messaging via **WebSocket (Socket.io)** communication.
- Integrated the **Google Gemini API** to generate AI-powered medical responses and experimented with domain-specific prompt tuning for improved query relevance.
- Implemented secure JWT-based authentication with token refresh handling and optimized React state management for efficient real-time updates.

Skills

Programming Languages: Java, JavaScript, TypeScript, Python, SQL

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, TailwindCSS, HTML, CSS

Databases & Tools: MongoDB, PostgreSQL, Git, GitHub, Docker VS Code, Postman, Vercel, IntelliJ IDEA

Technologies: WebSockets (Socket.io), JSON Web Tokens (JWT), OAuth 2.0, REST APIs, UDP

Core Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks

Achievements & Activities

- **Adobe Hackathon (Jan 2025):** Participated in Round 1, solving complex DSA problems and technical MCQs.
- **Competitive Programming:** Solved **450+ LeetCode problems** with a peak contest rating of **1519**, demonstrating strong problem-solving and algorithmic reasoning across 20+ LeetCode and 17 CodeChef contests.
- **Awards:** Earned the **200 Days Badge 2025** on LeetCode for problem-solving consistency.
