

MANYAM JAGADEESWAR REDDY

Phone: +91 91103 85587 | manyamjagadeeswar7989@gmail.com | LinkedIn | GitHub
LeetCode | Location: Dharwad, Karnataka

EDUCATION

Indian Institute of Information Technology Dharwad
B.Tech - Data Science and Artificial Intelligence

2023 – 2027 (Expected)
GPA: 8.21

EXPERIENCE

Full-Stack Developer | Freelance

Jan 2026 – Feb 2026

FutureStocks – Real-Time Market Intelligence Platform

[Live Link](#)

- Architected a **scalable split-process deployment** with **Next.js** on **Vercel** (serverless APIs) and **Socket.IO** on **AWS EC2 (Linux)**, secured via JWT-authenticated handshakes and role-based access control.
- Built a **cron-driven ingestion pipeline** for NIFTY 500 stocks via Upstox API, batching 20 symbols per request with controlled rate limiting and **MongoDB bulk upserts**.
- Designed a **dual-write MongoDB strategy** using **TTL-indexed** intraday snapshots and a persistent closing-window fallback (3:10–3:45 PM IST) for post-market data availability.
- Developed a **3-step admin MFA system** (password + SMS OTP + email OTP) with **bcrypt**-hashed OTP storage and database-backed **rate limiting**.
- Managed EC2 server configuration, process monitoring, and log management using **Linux CLI tools**; containerized services with **Docker** for consistent runtime behavior.

PROJECTS

TeamConnect – AI-Powered Collaboration Platform | [GitHub Link](#)

Feb 2026 – Present

Tech Stack: Node.js, Express.js, TypeScript, PostgreSQL, Prisma ORM, React.js, Socket.IO, Gemini AI

- Built a **workspace-based collaboration platform** with JWT authentication (access + refresh tokens), email verification, role-based membership, and participant-level access control.
- Implemented **real-time messaging using Socket.IO** with room-based broadcasting, message editing, soft deletion, typing indicators, and online presence tracking.
- Developed a **Knowledge Hub** with Action Items, Decision Logs, and **AI-generated conversation summaries** using Gemini API to extract key outcomes from discussions.

NetViz Pro – Reliable Transport Simulator | [GitHub Link](#)

Dec 2025

Tech Stack: Java, Node.js, React.js, UDP, WebSockets

- Engineered a custom **Reliable UDP protocol in Java** using Hybrid Sliding Window ARQ to ensure data integrity through checksum validation, packet sequencing, and retransmission logic.
- Implemented **cumulative acknowledgments, retransmission timers, and packet loss simulation (0–100%)** to analyze throughput and reliability under network instability.
- Built a distributed bridge integrating a Java-based transport layer with a WebSocket dashboard for real-time transmission monitoring and ACK visualization.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, C++ (basic), SQL

Frameworks & Libraries: Node.js, Express.js, Next.js, React.js

Databases & Tools: MongoDB, PostgreSQL, Git, GitHub, AWS EC2, Docker

Technologies: RESTful APIs, WebSockets, JWT, OAuth 2.0, UDP, Linux CLI

Core Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

ACHIEVEMENTS

- Solved **450+ LeetCode problems** with a peak contest rating of **1519**, demonstrating strong algorithmic reasoning and problem-solving ability across multiple contests.
- **Awards:** Earned the **200 Days Badge 2025** on LeetCode for consistent daily problem-solving discipline.
